

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please replace the Abstract of the Disclosure at page 20, line 2 through line 22 with the following amended paragraph:

In a multilayered molten resin mass capable of providing a multilayered compression-molded product, the layers of the multilayered compression-molded product are distributed uniformly in the circumferential direction with the intermediate resin layer positioned entirely within the inner and outer resin layers. In the multilayered molten resin mass (1), interlayer resin (3) is ~~embedded eccentrically towards~~ positioned closer to the bottom within inner/outer resin (2) making up the inner and outer layers. The shape of the interlayer resin (3) is controlled so as to achieve a concave shape. The distance t from the lower end of the interlayer resin (3) to the lower end of the multilayered molten resin mass (1) can be 10% or less of the entire length of the multilayered molten resin mass.
